3/22/2019 Stand-up
Time: 4:45
Location: Dulce
Participants: all

	Standup #1 (3/21/18)		
Team Member	*What have you accomplished since last meeting?*	*Are there any obstacles in the way of meeting your goal?*	*What will you accomplish before the next meeting?*
Eric Choi	Reviewed frontend repository, installed React, installed NodeJS, consulted previous developer of legacy code, and set up environment.	Lack of comments in legacy code, poor functionality of legacy code, malfunction of list functionality from previous project, poor understanding of React.	Design new pages in Figma, implement list functionality, clean up frontend code, and learn how to pull from Heroku.
Katrina Chandra	Read frontend code, installed React, installed NodeJS, and currently I am in the middle of setting up environment.	Lack of comments in legacy code, unfinished code	Finish setting up environment, clean up frontend code, implement list functionality.
Caleb Thomas	Cleaned up backend repository. Removed unused artifacts and project files generated by Eclipse. Added team members to the backend repository.		Setup server on Heroku, Setup Database, Create user class, authentication, and registration.
Shray Pungaliya	Reviewed repository. Understand classes, functions, APIs. Set up project workspace.	Setting up the environment.	Environment setup,
Kartik	Reviewed Front-End Repository, Combined work from past	Yes, setting up environment within VSCode. Difficult to	Fix list page set-up, component the dropdown, rename names

	projects to create a new workspace, Created repo folder to store all Scrum Meeting notes.	configure Node format.
